

Anil Kumar Rana

Frontend Developer

I am eager to learn and grow as a frontend developer. I have taken online courses and tutorials to expand my knowledge, and I am excited to apply my skills and contribute to a team in a professional setting. I am a quick learner and a dedicated problem-solver, and I am confident that I would make a valuable addition to any frontend development team.

INTERNSHIP

Simplbyte

(March) 2023 - (April) 2023

During my internship at Simplbyte, I gained valuable experience in web development and design. I completed four projects using various technologies, including:

- **Portfolio, Weather app, Todo lists app** using Reactjs and Tailwind Css
- **Quiz app** using HTML, CSS, and JavaScript

These projects allowed me to learn and apply new technologies, such as Redux, API integration, Tailwind CSS, and JSON data manipulation,

I was able to leverage my skills in front-end development, as well as my problem-solving abilities, to deliver high-quality projects within deadlines.

Overall, my internship at Simplbyte was an enriching experience that helped me grow as a web developer and provided me with valuable skills that I can apply to future projects.

PROJECTS

PORTFOLIO 🔗

- Developed my own portfolio website from scratch using ReactJS and Tailwind CSS.
- Implemented various React features such as React Hooks, functional components, and state management to create a dynamic and interactive user interface.
- Utilized Tailwind CSS to design and style the website, improving its overall user experience and visual appeal.
- Learned new skills in React Hooks and functional components, which allowed me to create reusable code blocks and improve the performance of my applications.

YOUTUBE CLONE 🔗

- Developed a YouTube clone using ReactJS and Tailwind CSS, which allowed users to search and play videos with ease.
- Implemented Rapid YouTube's API in ReactJS to fetch video data and metadata, providing a seamless user experience.
- Gained a deeper understanding of advanced JavaScript concepts, such as callbacks, promises, and async/await, which were crucial in working with APIs.
- Leveraged Tailwind CSS to create a visually appealing and responsive UI for the YouTube clone, making it accessible on various devices and screen sizes.
- Demonstrated proficiency in using Git and GitHub for version control, allowing for easy collaboration with other developers and streamlined project management.

Landing page animate on scroll 🔗

- Created a landing page with animated scrolling using ReactJS and Tailwind CSS.
- Utilized React Icons, Tailwind CSS, components, and hooks to develop a dynamic and engaging user experience.
- Gained proficiency in ReactJS and Tailwind CSS while building the project.

EDUCATION

Technocrats Institute Of Technology, Bhopal

2020 - 2024

(Bachelor in Computer Science Engineering - AIML)

8.47 CGPA

SKILLS

HTML

CSS

Javascript

Tailwind CSS

React.js

C++

Git

Git-Hub

Problem-Solving

Redux

DSA

ACHIEVMENT

GIT-HUB 🔗

Oct 2022-Present

Total 500+ Commits on Github. Great experience and learning alot about working with Github and open source. Connecting with developers.

LEETCODE 🔗

Solved 150+ Data Structure and Algorithm Problems using C++ and Javascript.

TRAINING AND CERTIFICATES

Frontend Web Development With React 🔗

(Coursera)

Javascript Algorithm & Data-Structure 🔗

(FreeCodecamp)
